two tips

pouch included

easy to clean

USB-C

Charging via **USB-C**

The Neno Aria electronic aspirator is perfect for both indoor and outdoor use. Thanks to the fact that it has a universal USB-C port and cable included, you can easily charge it anywhere. Simply connect the device to a stationary power source or powerbank.

2 tips

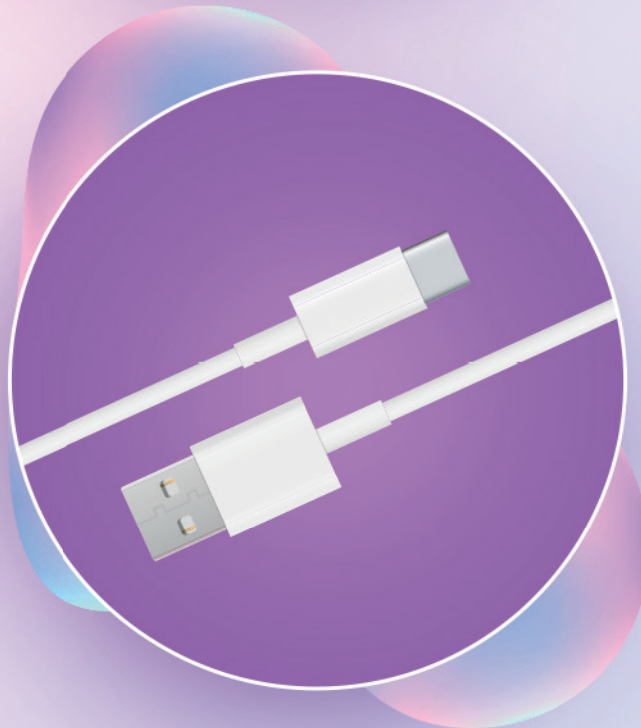

Want to gently but effectively clean your child's nose? Nothing could be easier! Switch on the aspirator, choose one of the two age-appropriate nozzles and go to work. Clearing the airways will bring your little one instant relief.

Full set

The aspirator will arrive in your hands with all the necessary components. In addition to the head, tips and secretion container, you will also receive a dedicated charging cable and a practical pouch for storage.

*A long lasting
device*

*since
birth*

*up to 6 years
of age*

We have designed the aspirator to serve you for many years. The age-appropriate tips allow you to express the runny nose of both a baby and its older siblings.

Easy cleaning

Maintaining the proper hygiene of the aspirator is extremely easy thanks to its clever design. The secretion container does not have unnecessary recesses or protrusions, so you can easily get rid of the remnants of a runny nose. You can also easily clean and sterilize the tips made of soft silicone.

Cordless operation

Cordless operation makes using the aspirator extremely convenient. The absence of cables and the long operating time (up to 2 hours in the most intensive mode!) guarantee comfortable discharge during infections and as part of everyday hygiene.

2h
OF WORK

Easy operation

Operating the Neno Aria is child's play, as its controls are limited only to a clear panel with touch-sensitive buttons. It only takes 2 touches to start the aspirator!

Lightweight and mobile

The included pouch is not only aesthetically pleasing but also very helpful when carrying the device. The capacious pouch makes it possible to take the aspirator for a walk, on a journey by car, train, tram or even plane.

Adjustable suction power

A runny nose is a real nightmare for babies, who are also unable to get rid of it themselves. Depending on how much secretion has accumulated in the nose, you can set the appropriate mode to ensure that the secretion is sucked out effectively.

3 levels of suction

A must have for your layette

Is the time of birth fast approaching? It's time to make a layette list, which should undoubtedly include our lightweight and handy aspirator. A modern, cordless breast pump, a device with sterilising and heating function, a contactless thermometer, a tissue warmer, a milk collector and a supply of sanitary pads will also make a great addition to the layette.
